

KOREA : 3550 WON DEFINITIVE ISSUE DURING BASIC RATE 300 WON PERIOD

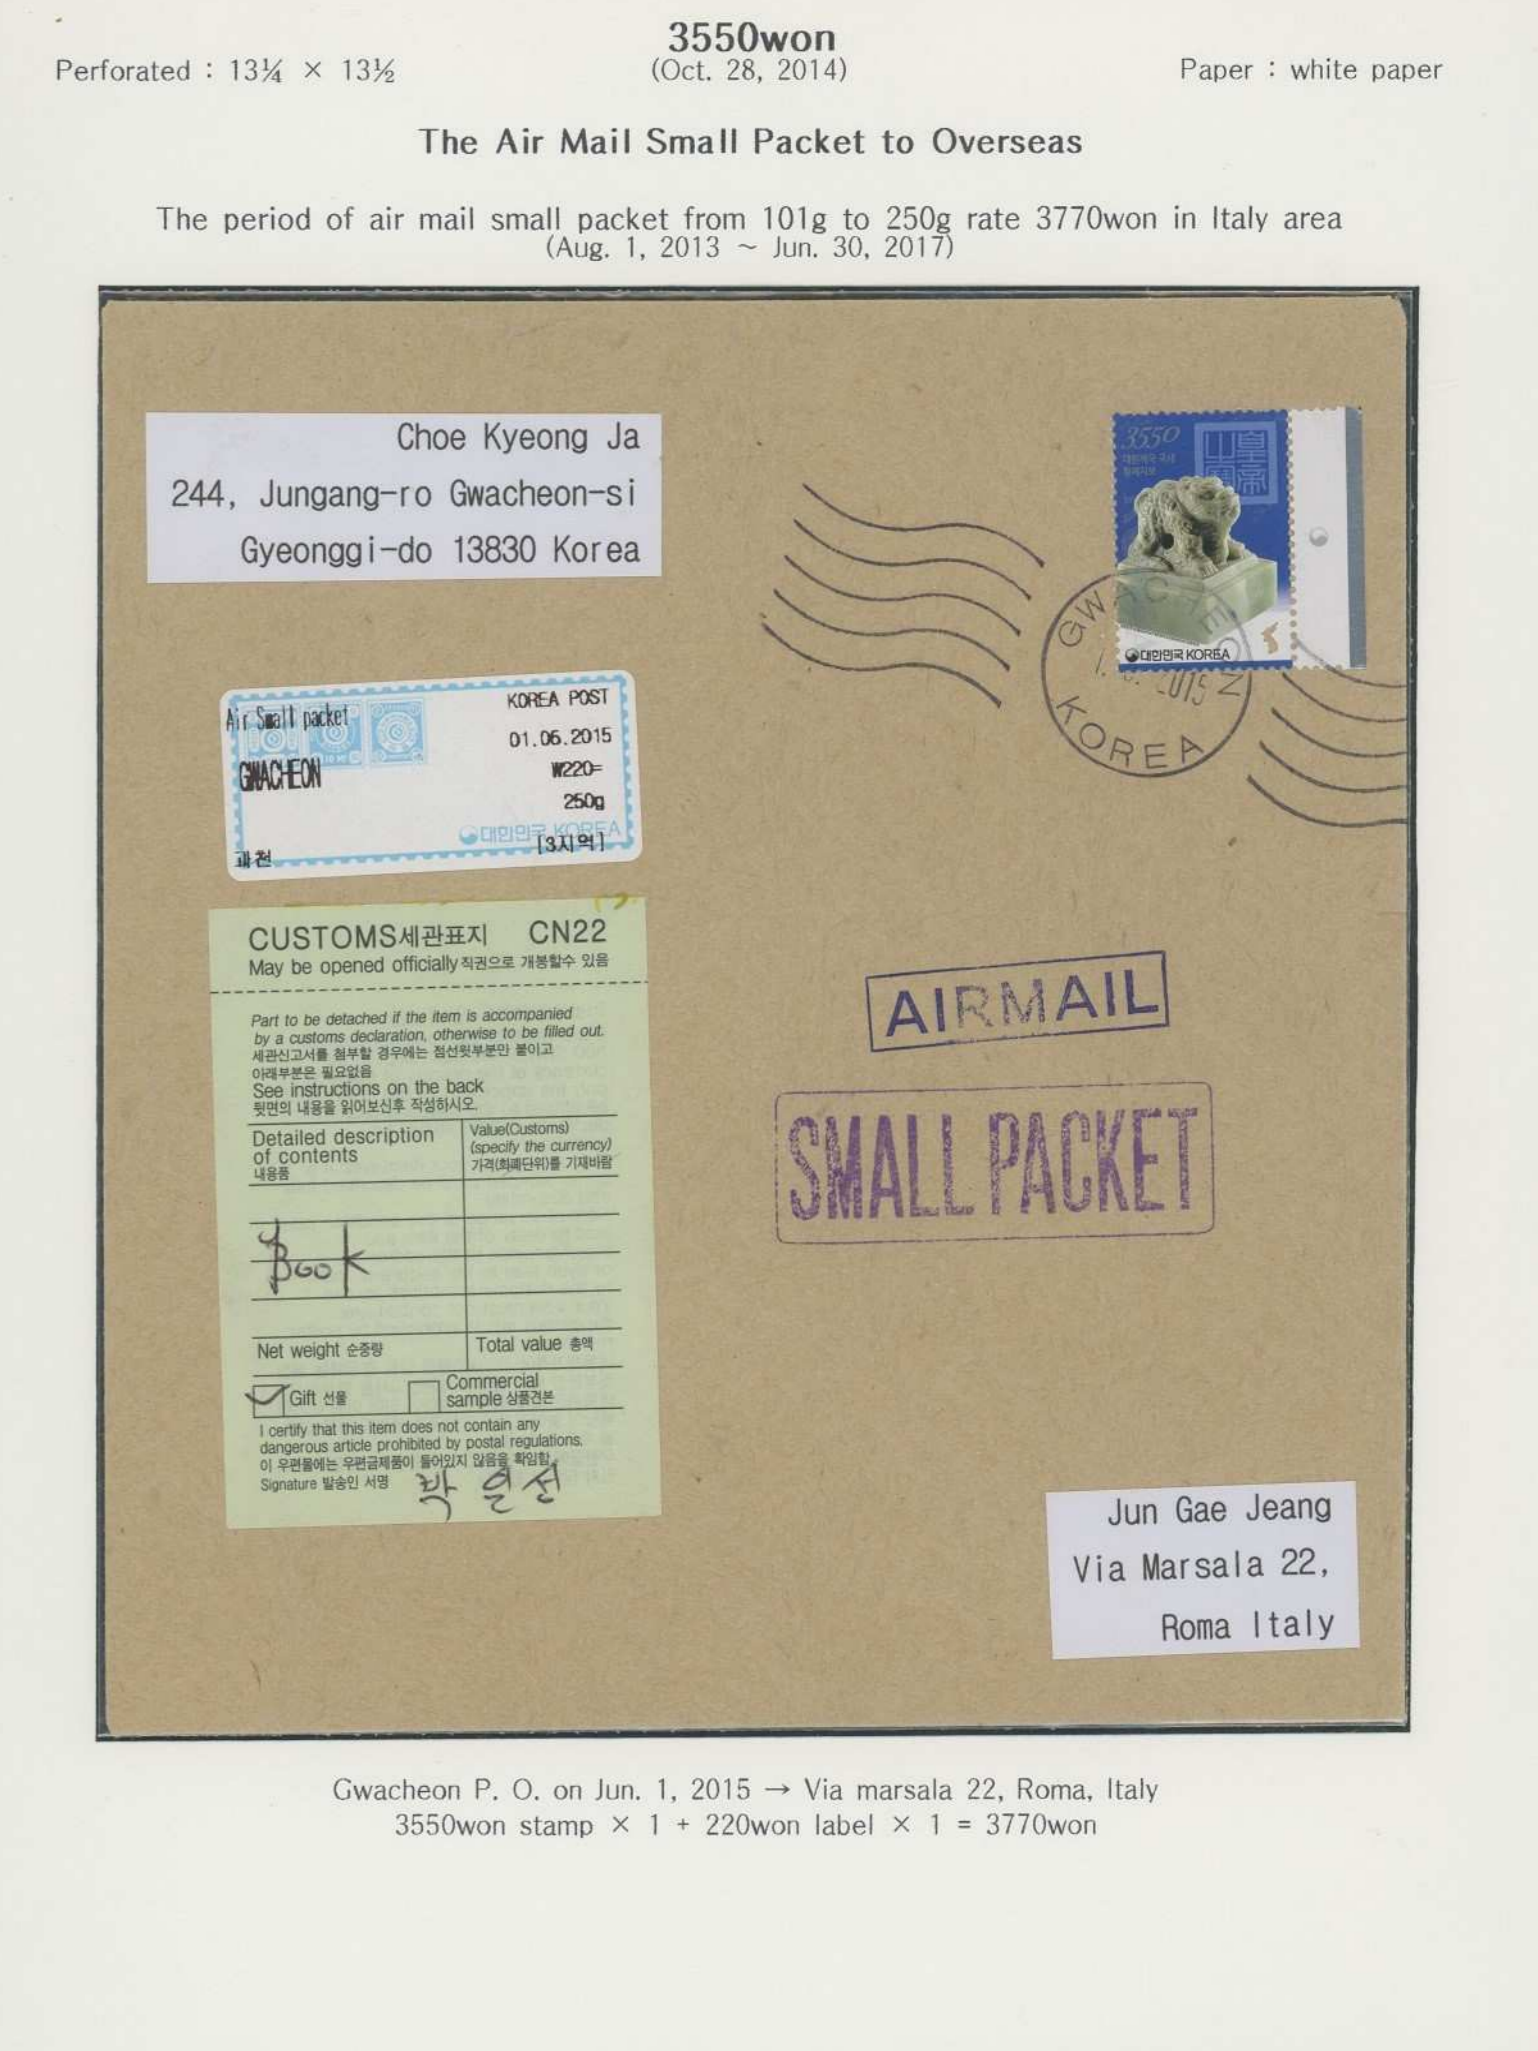

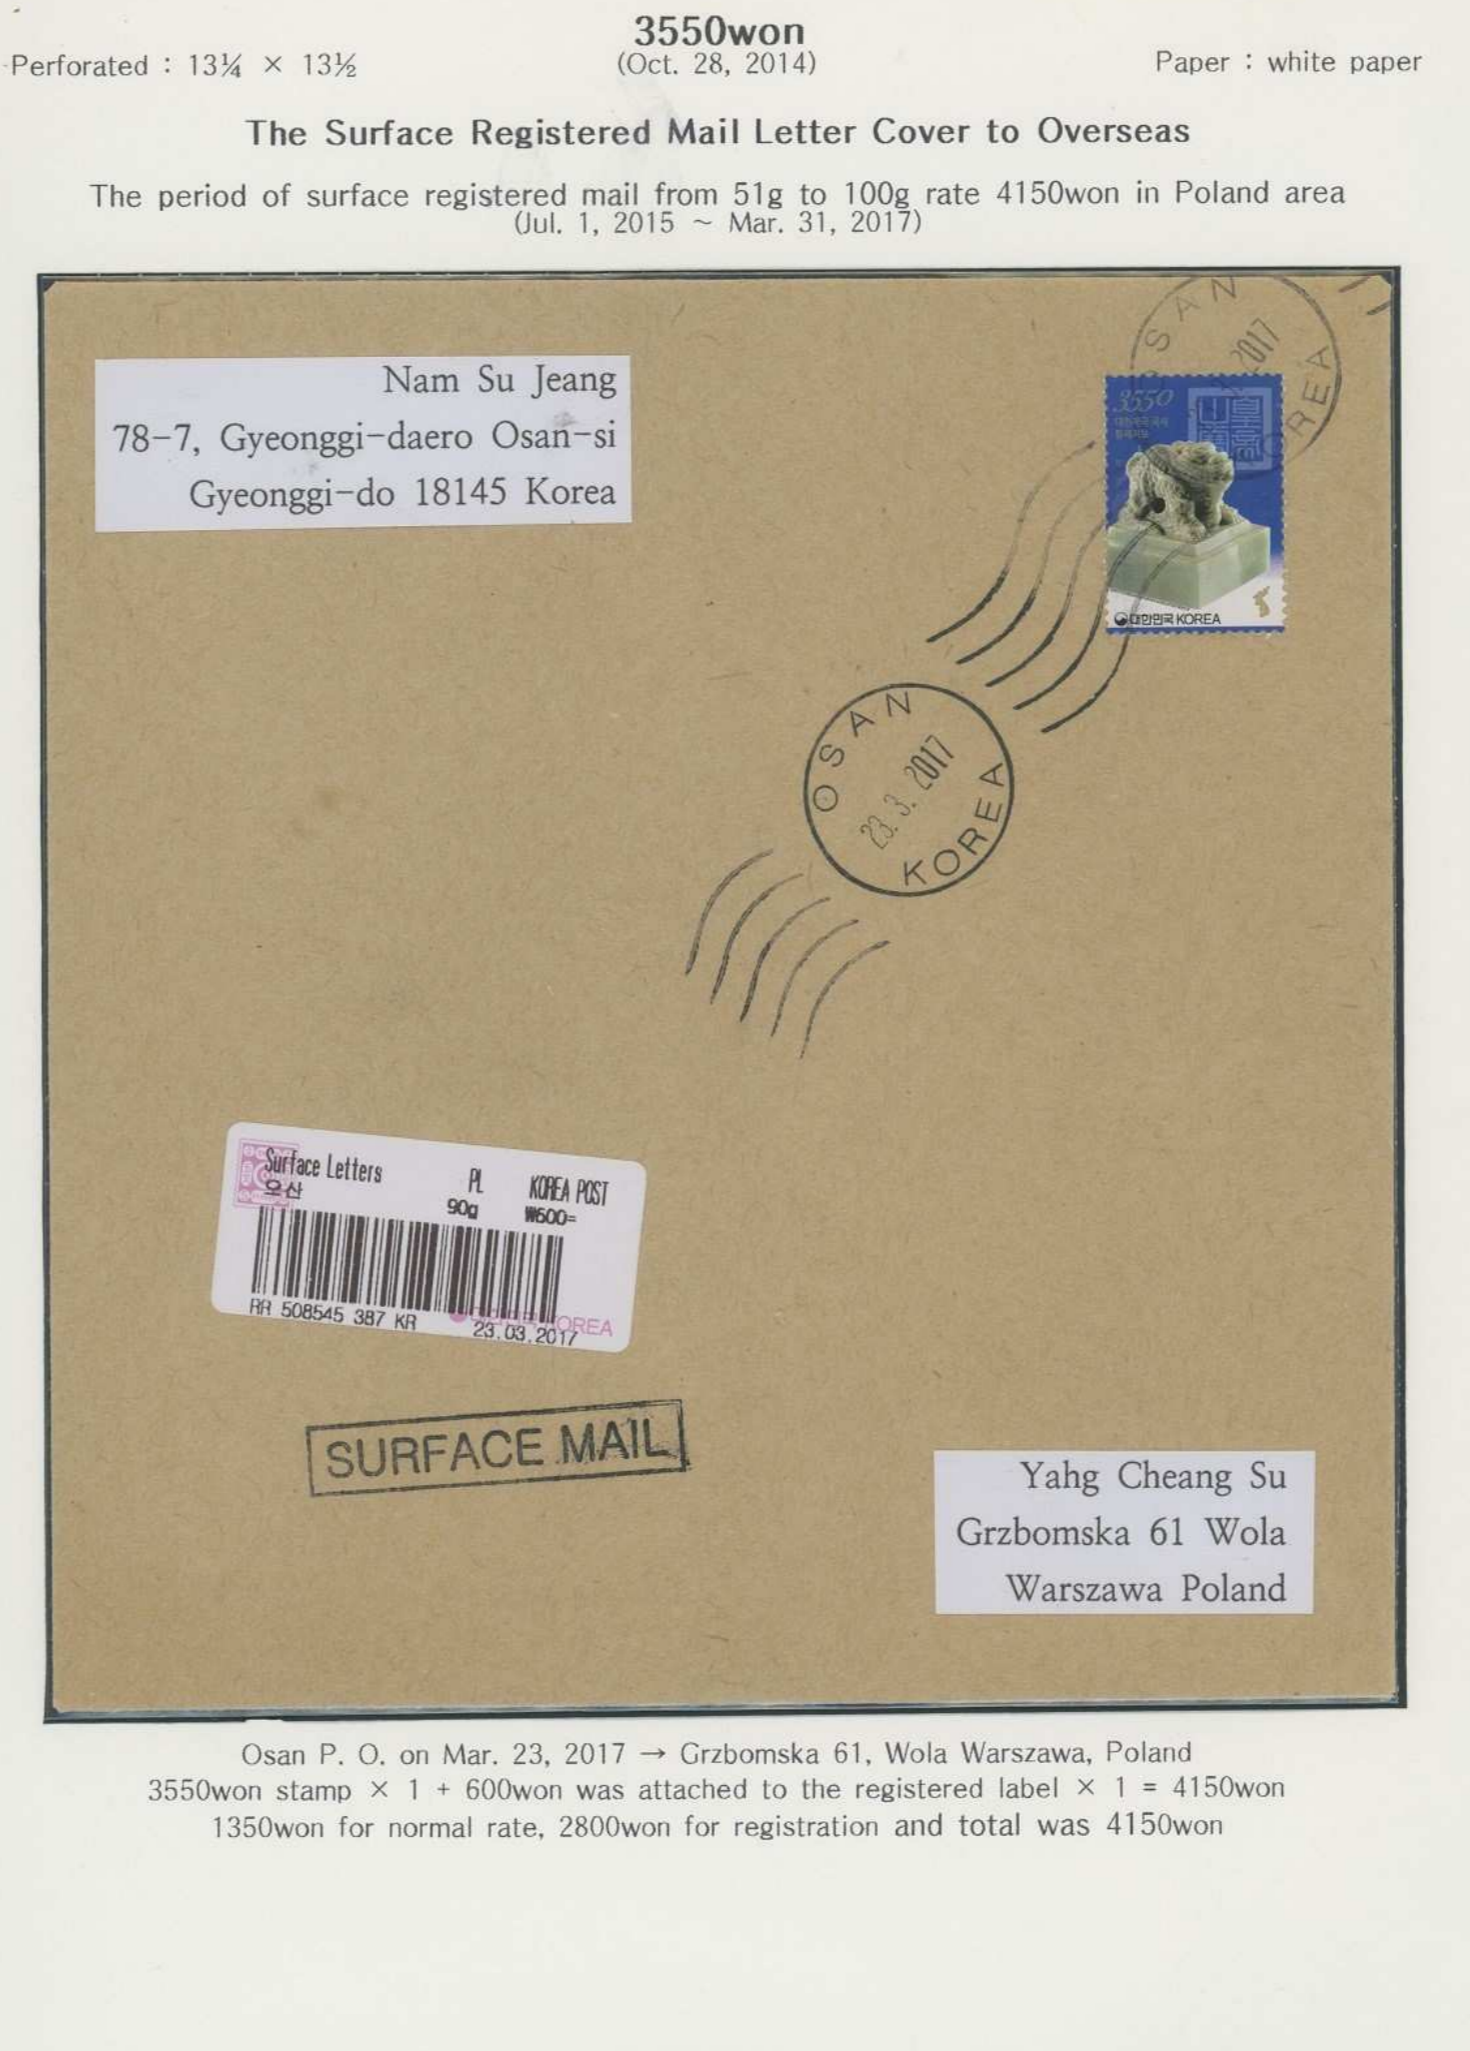

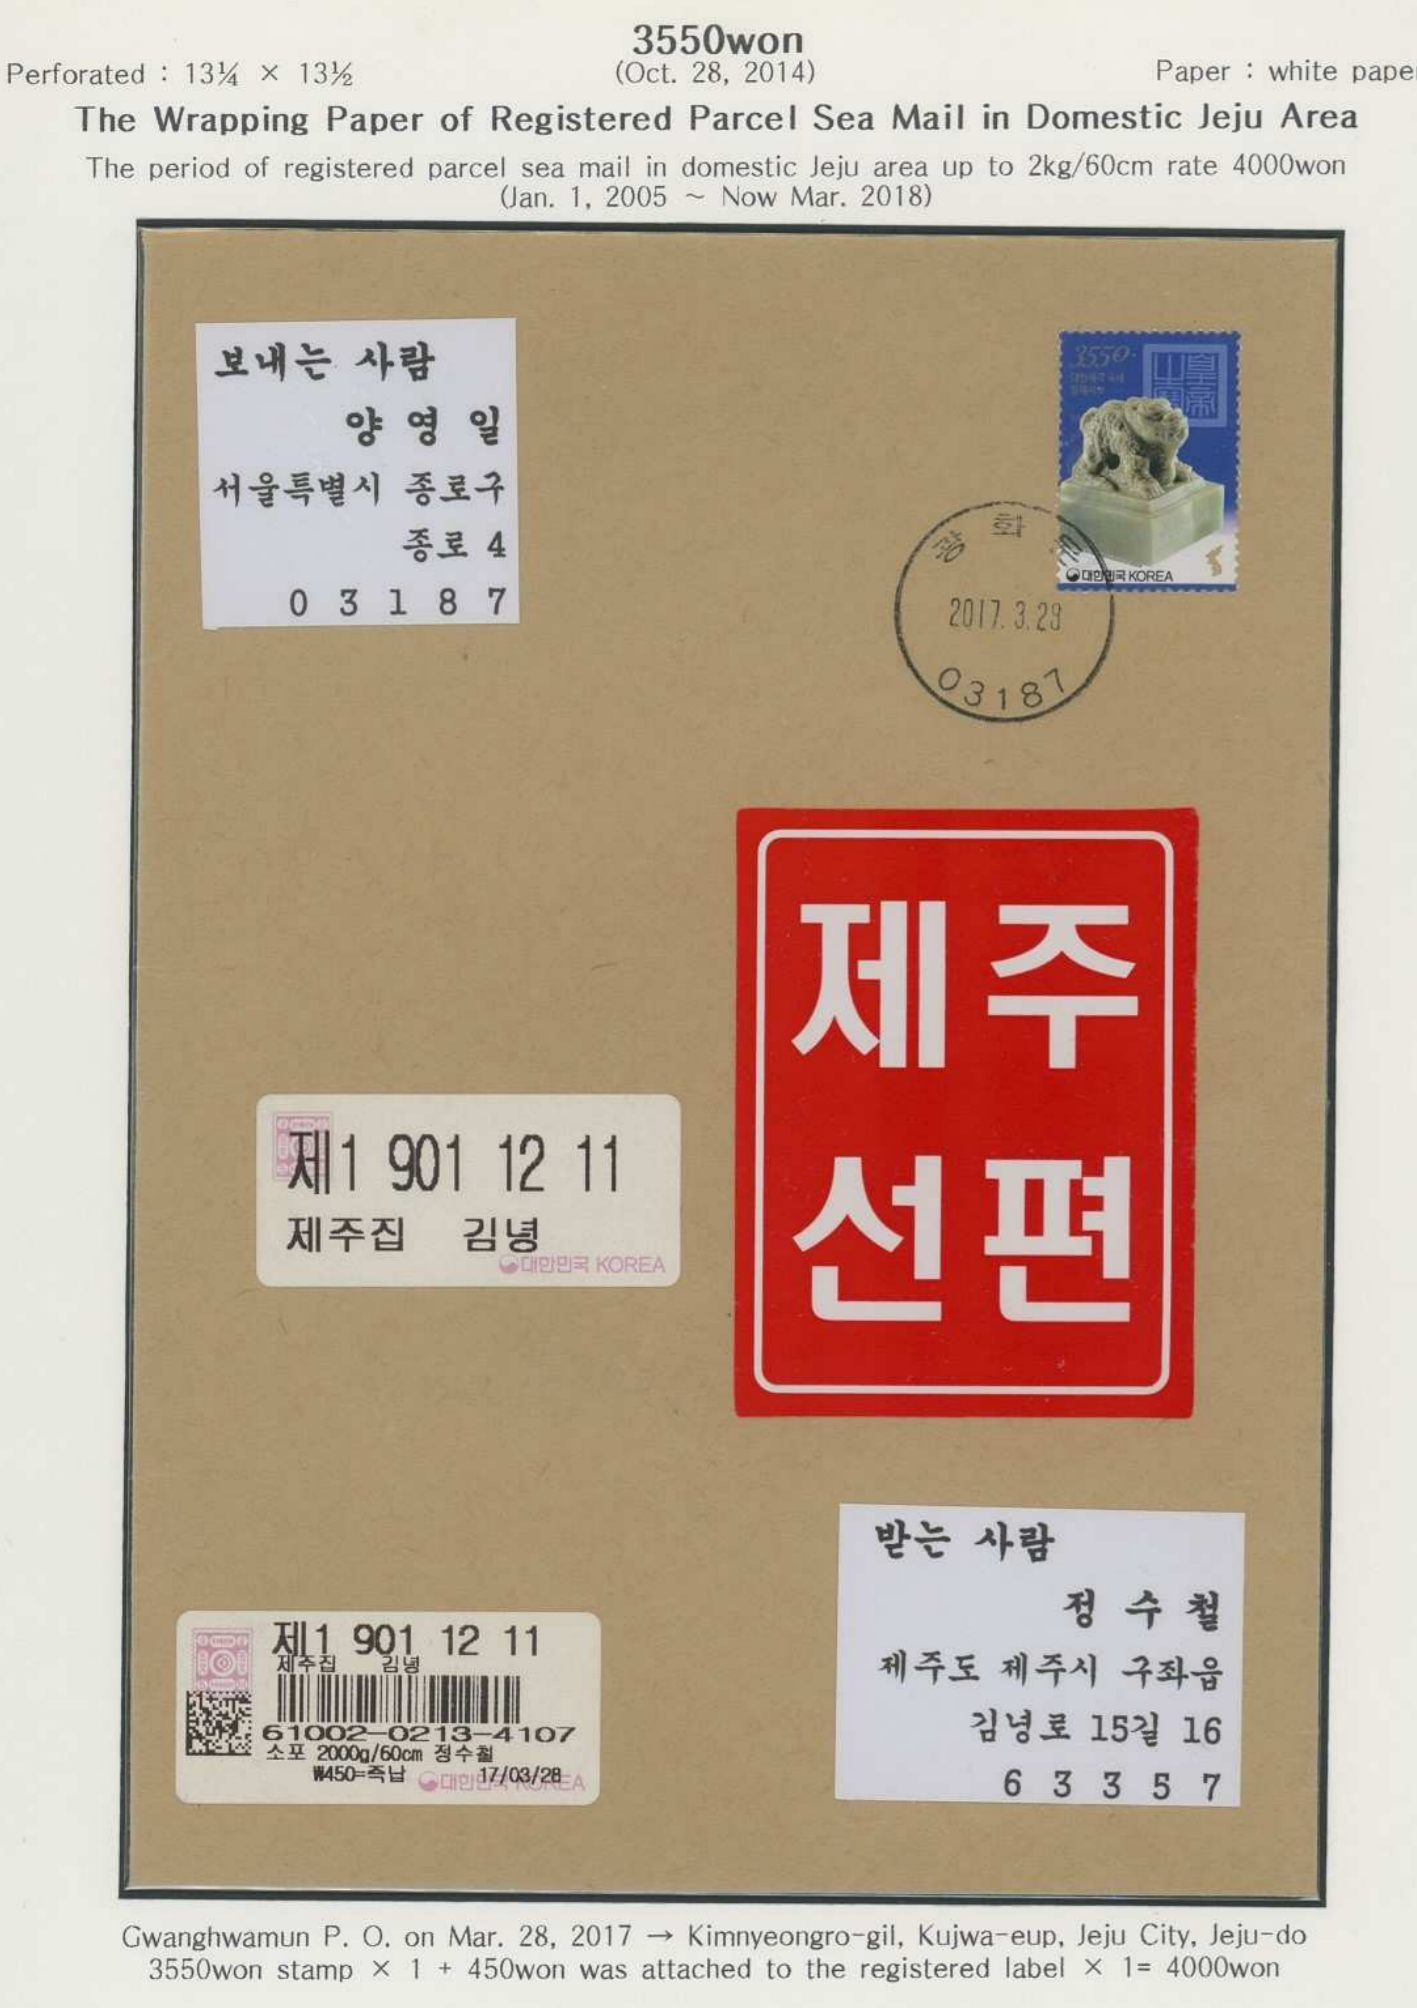

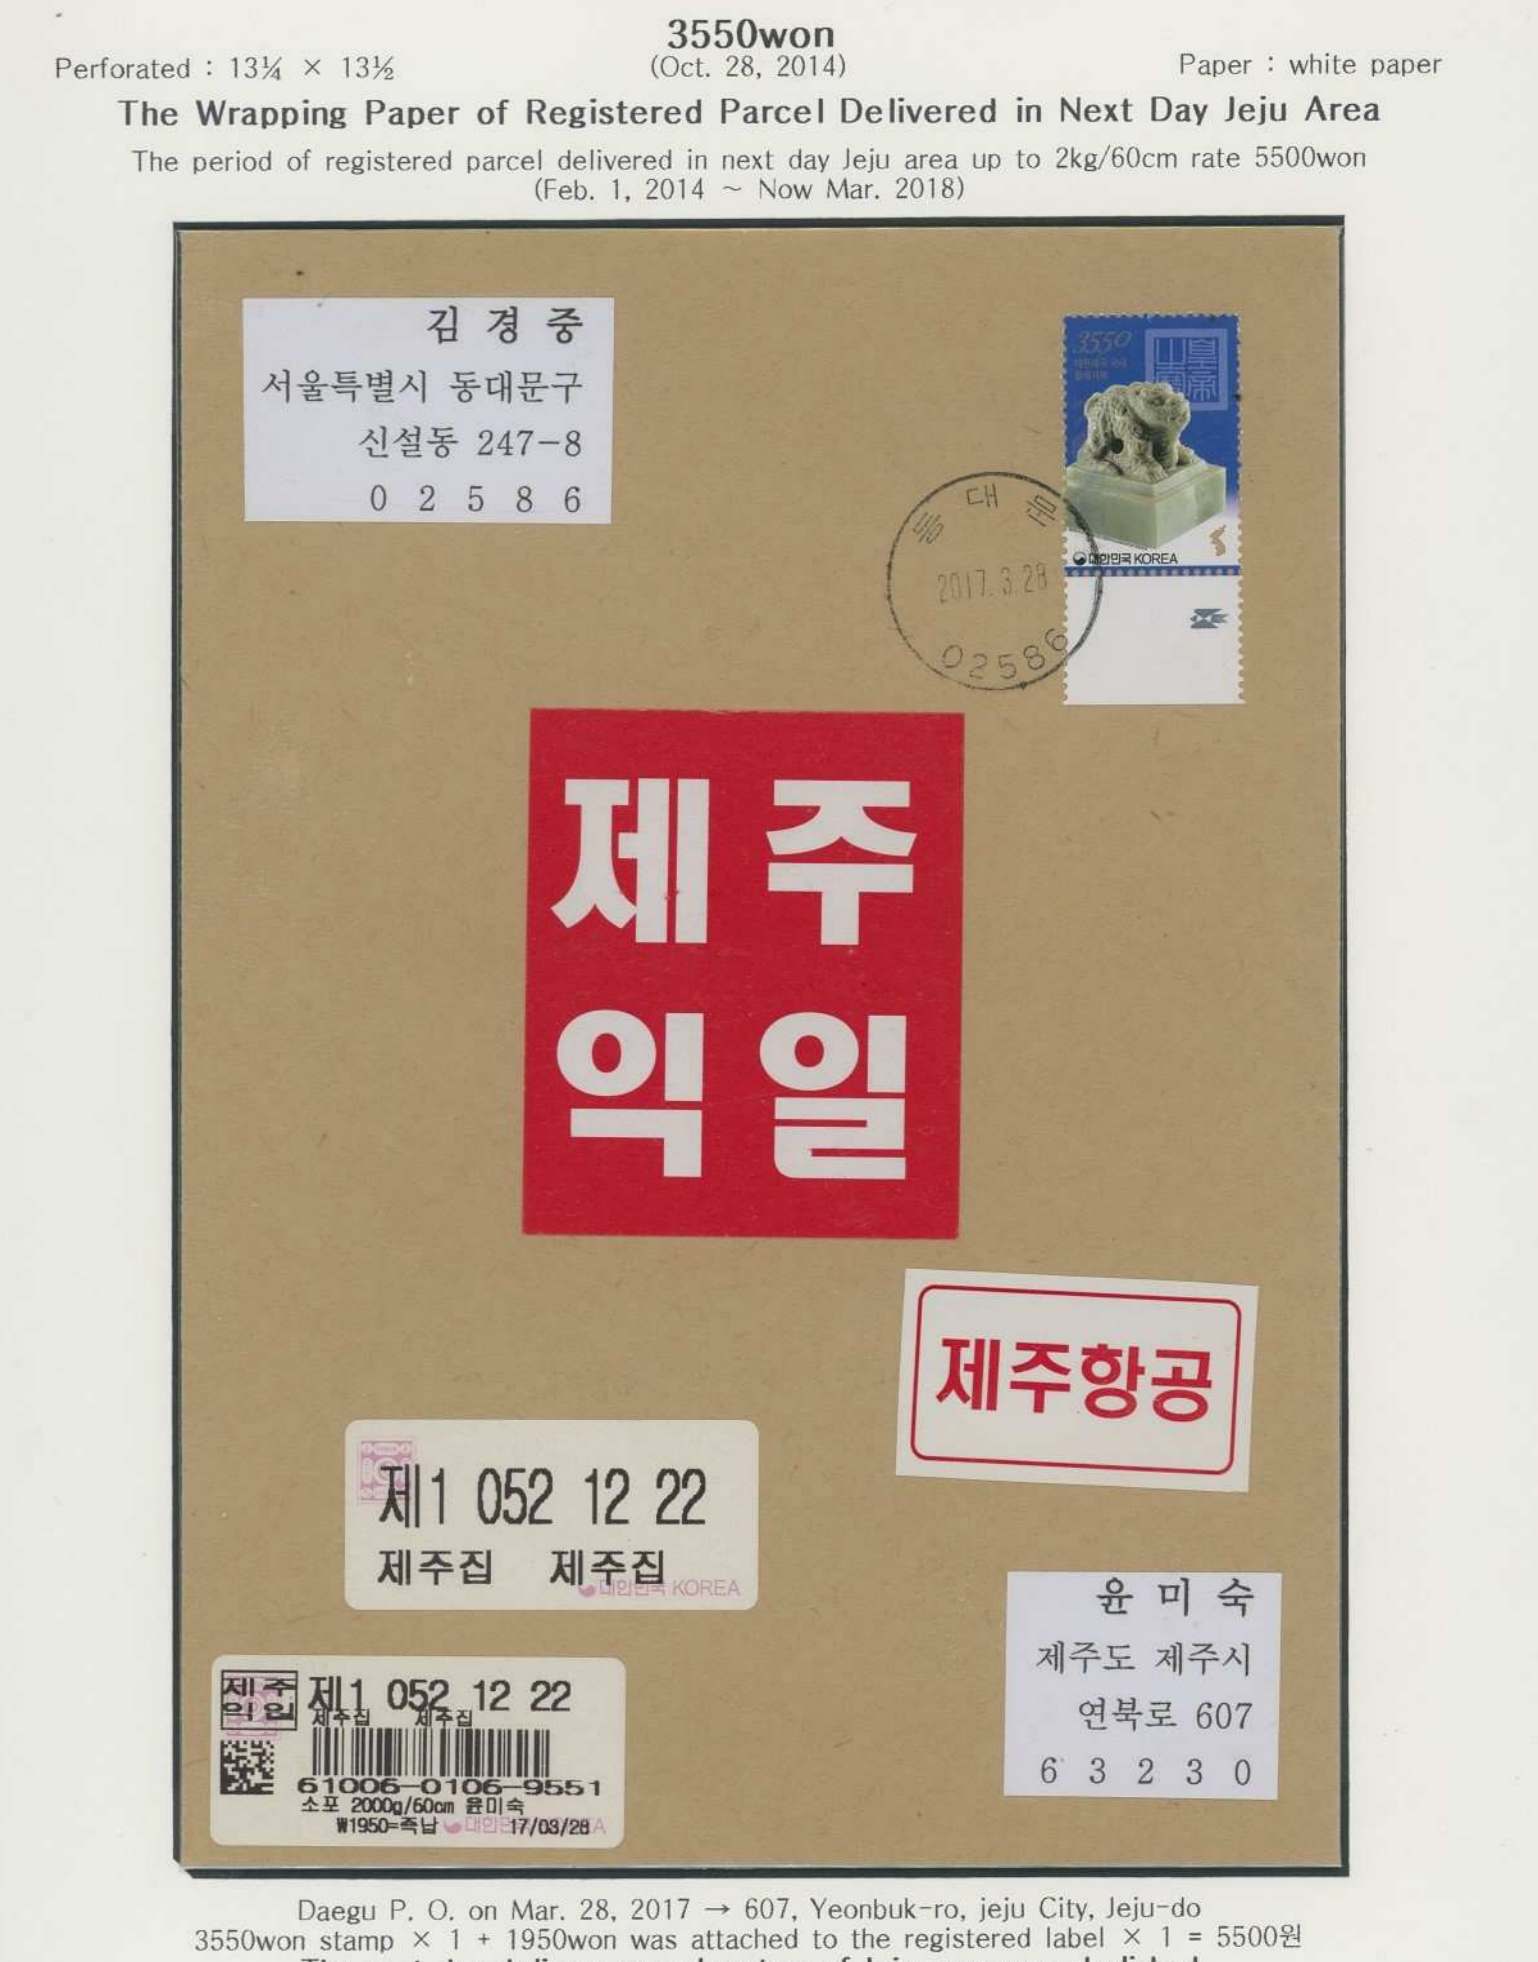

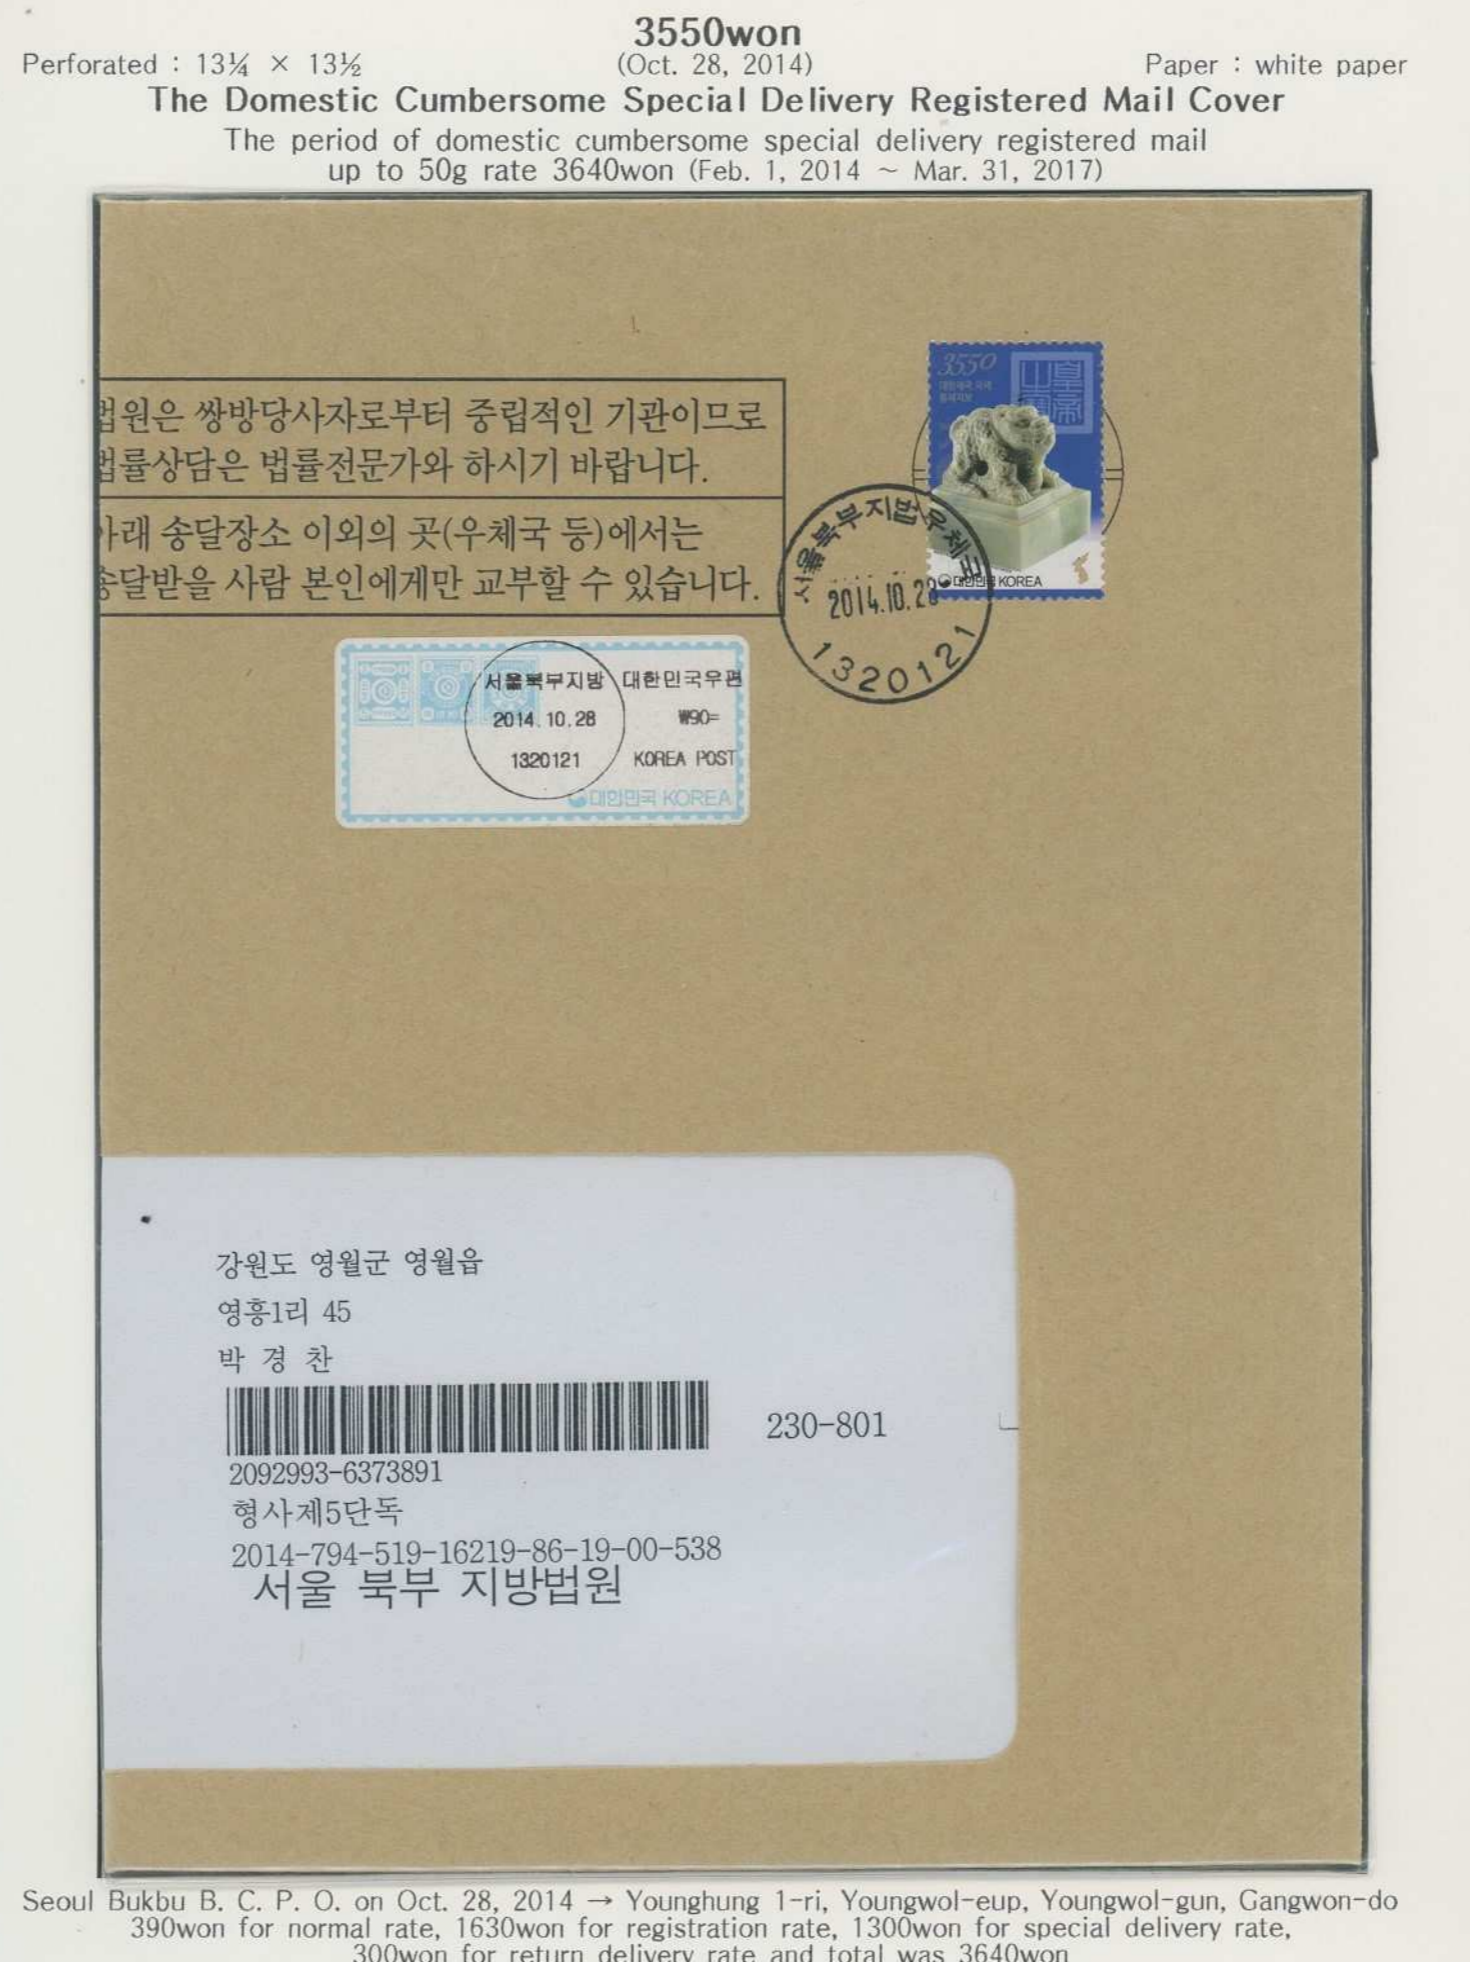

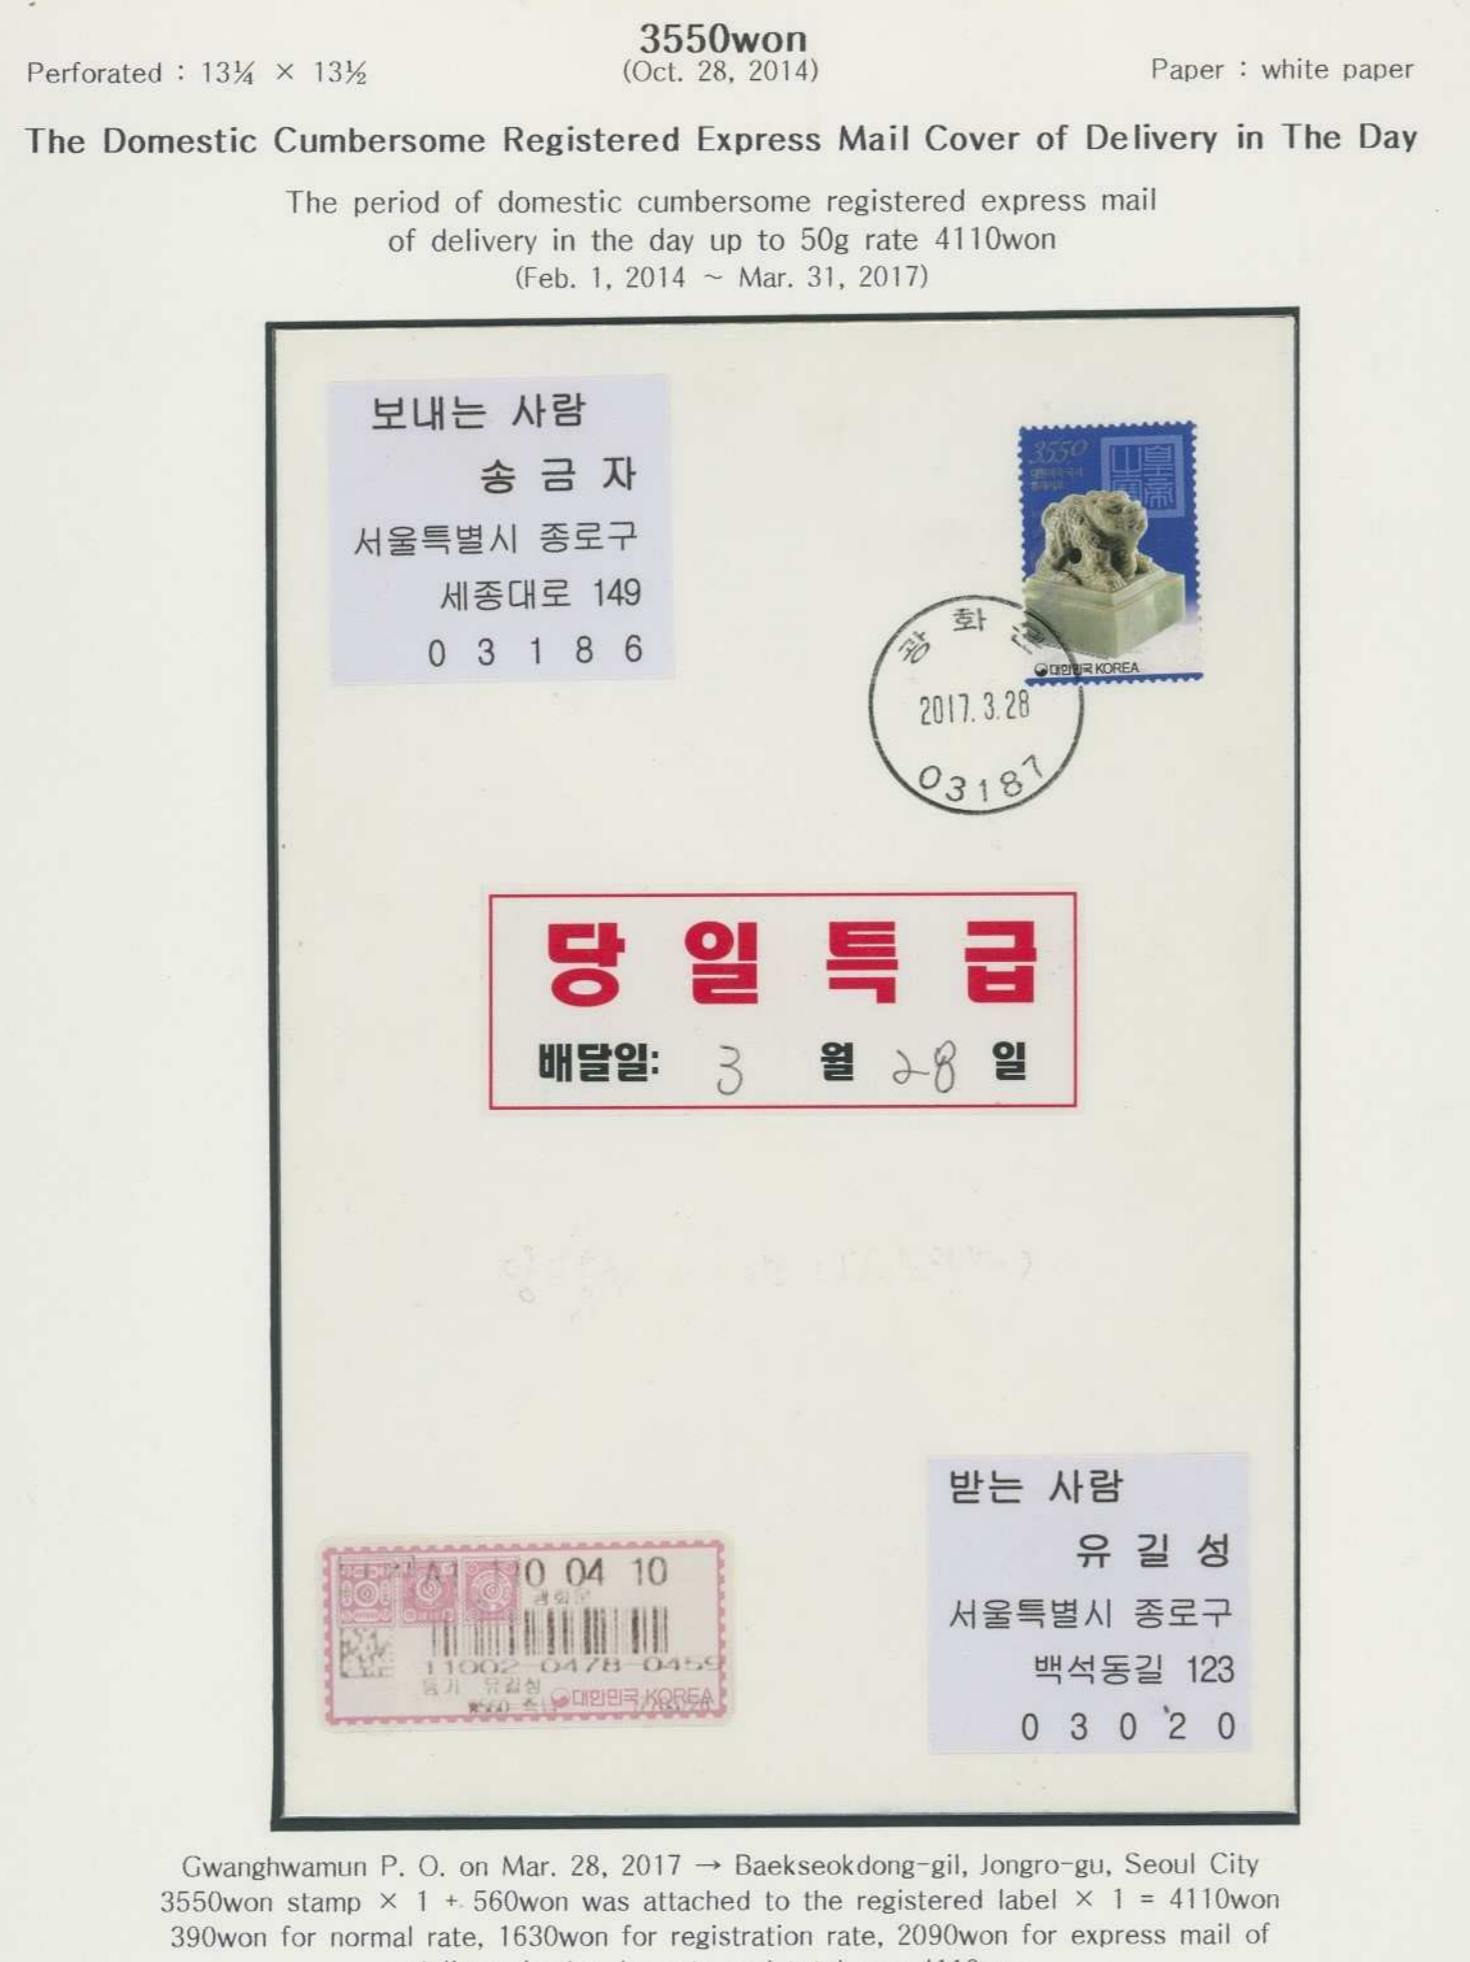

On Nov. 11, 2013 postage rates were increased. Accordingly, on Oct. 28, 2014, a definitive stamp of 3550won was issued for special delivery at the court. Therefore, this exhibition work is one frame made of 3550won definitive stamp.

This stamp was printed in the Korea Minting & Security Printing Corporation. The printer paper was used by white paper made in Korea. The calculation number is 7 units of ink-jet nozzle spraying type and the perforation is 13¼ × 13¼.

I studied imprint position & plate position marks, calculation number, color marks, designer and publisher in terms of printing process for 3550won stamps. I presented the covers used in domestic and foreign mail items that meet the proper rate in terms of postal history.

The important materials of this exhibition are as follows:

- Page #04 : The domestic special delivery registered mail cover is very hard to get.
- Page #05 : The domestic express certified delivery mail cover in the next day is very hard to get.
- Page #06 : The domestic cumbersome registered express mail cover of delivery in the day very hard to obtain.
- Page #09 : The wrapping paper of registered parcel sea mail in domestic Jeju area is not easy to obtain.
- Page #11 : The registered express air mail cover to overseas is very hard to obtain.
- Page #12 : The certified delivery air mail cover to overseas is very hard to get.
- Page #13 : The insured and registered express air mail letter cover to overseas is very hard to obtain.
- Page #15 : The air mail spall Packet to overseas is not easy to obtain.

KOREA : 3550 WON DEFINITIVE ISSUE DURING BASIC RATE 300 WON PERIOD

On Nov. 11, 2013 postage rates were increased. Accordingly, on Oct. 28, 2014, a definitive stamp of 3550won was issued for special delivery at the court. Therefore, this the exhibition work is one frame made of 3550won definitive stamp.

This stamp was printed in the Korea Minting & Security Printing Corporation. The printer paper was used by white paper made in Korea. The calculation number is 7 units of ink-jet nozzle spraying type and the perforation is $13\frac{1}{4} \times 13\frac{1}{2}$.

I studied imprint position & plate position marks, calculation number, color marks, designer and publisher in terms of printing process for 3550won stamps. I presented the covers used in domestic and foreign mail items that meet the proper rate in terms of postal history.

The important materials of this exhibitions are as follows:
